

Configur8or

Graphical Rules-Based Configurator

- Rules-Based
- Web Based
- Handles Products / Services
- Graphical Representation
- Price/Cost Calculations
- Develop Quotes /Orders
- Easily Create Models

Do you sell a complex product or service with many variations? Does every quote have to go to the engineering department or specialist? Are you losing money because they are quoted incorrectly? Do your sales people take orders for products that cannot be built? Do you have a never ending backlog of quotations?

You need Configur8or

Configur8or is a graphical rules-based configurator that allows you to quickly and easily configure **ANYTHING** from complex mechanical products to apparel!

Integrated to your CRM or ERP system, or through the web to your customers, distributors or salespeople, Configur8or quickly creates a priced, costed, order or quotation, with a custom bill of material and routing, ready for manufacturing or picking.

Configur8or does not stop there, as the product is being configured, the user can see a picture of the actual item change as features, options and colours are selected. Isn't a picture worth a thousand words?

Configur8or is so easy to use that, typically there is no end-user training required. A carefully guided set of questions, with allowable responses, are presented. As the user answers these questions the price is being displayed and the product is built before their eyes. Error free. If desired, a printed quote, with options, prices and the item's picture can be printed.

Historically, creating configurator models could take months or years! Dispel the myth.
Configur8or models can be created in just hours or days without programming!

Designed for today's global economy, Configur8or also supports multiple languages and currencies.

Easily Integrated to YOUR system

Want Configur8or integrated to your CRM or quotation system? How about your custom order entry system? Packaged ERP? No Problem. Configur8or's Enterprise Integration Tools allow you to seamlessly exchange data between your applications.

The created Bill of Material, Routing and or Services can seamlessly be posted to your ERP system.. You can then store it as a permanent or temporary Bill of Material or Routing, go directly to a works order or picking list.

Configur8or... The Visual Configurator

Everybody Wins

Your company reduces costs and responds better to your customers. Your quote backlog is reduced and products can actually be produced for the quoted price! Configur8or's tight integration with your existing systems avoids any unnecessary manual data input into multiple disconnected systems. The correct product ships faster at a lower cost.

Configure Anything!

Unlike some product specific configurators, Configur8or was designed to be flexible and applicable to countless diverse environments! You can order fast food, design a car or configure windows and doors, electronics, chemicals or anything else! If your business or products change, Configur8or can keep up. No need for a technology change.

Rules-Based:

Model creation supports rules and dependencies. Simply put, the response to a question can determine the allowable responses to the other questions. Dimensions and constraints may be added as well. Validation occurs immediately. Configur8or's industry leading "Rules Builder" eliminates traditional programming syntax and allows the model builder to pick and choose data elements and values and apply them as the conditions for questions and responses.

Configur8or benefits businesses in over 132 SIC categories
